Promotes paint adhesion to most automotive surfaces, like plastics, aluminum, galvanized metal, zinc, painted surfaces, fiberglass and even body fillers. Replaces the need to abrade surfaces in hard-to-sand areas, like under hoods and deck lids.

- Excellent adhesion characteristics
- Sprays flat
- Can be topcoated with most water or solvent based paint systems
- Helps to prevent lifting in hard to sand areas

### TECHNICAL DATA

#### Substrates

- Direct to metal
- Aluminum
- SMC
- Lightly abraded E-coat
- Prepared OEM paint surfaces
- Galvanized coated steels
- Fiberglass

#### APPLICATION GUIDE

##### Tools Required

- 220-400 Grit Sandpaper

##### Substrate Preparation

For best results, ensure the surface is thoroughly cleaned, degreased, dried and dust free.

- Thoroughly clean the area to be coated with detergent and water and allow to dry completely.
- Or
- Thoroughly clean and degrease surfaces with Precleaner or panel wipe by applying it with a clean wiper and wiping off with a second dry clean wiper.
- Tack Cloths can be used to remove loose dust from the panel immediately before application.

##### Mixing

Shake the aerosol can for at least 2 minutes before use

##### Coats

1 - 2 coats at a distance of approx. 10 inches from the surface.

- Build
  - 2µ / 0.08 mil
- Theoretical Coverage approx. ft²/unit
  - 32.3

*Theoretical Coverage per unit assuming 100% transfer efficiency and giving the dry film thickness between indicated values.

##### Flash-off / min @ 68°F

- between coats
  - 10 mins

##### Drying Times

- Dust free @ 68°F / min
  - 10
- Overcoat time @ 68°F / min
  - 20

Allow to dry 20 minutes before applying any solvent based primer, color or clear.

Drying time is dependent upon film thickness, humidity and temperature.
GRIP#4 1K Universal Adhesion Promotor Aerosol may be overpainted with solvent-based paint systems.

STORAGE & VOC INFORMATION

Shelf Life

2 years subject to proper storage conditions.

Aerosol cans should be stored for two hours at room temperature before use. For long term storage, keep in a dry well ventilated area and away from direct sunlight and frost. To clear the nozzle and maximize the lifespan of your aerosol, always invert the can and spray upside down for a few seconds after each use. Should the nozzle become blocked, remove it from the can and soak it in gentle thinners.

Recommended Storage Temperature 41°F - 77°F
Recommended Application Temperature 68°F
