For best results, good preparation is essential. Clean and degrease removing dirt, oil, grease and wax with cleaning solutions such as U-POL's SYSTEM 20 Degreasers (please check local VOC regulations). Abrade with grit paper as stated above for each respective substrate. Re-clean, dry and degrease the abraded substrate ready for application. *For optimum results, apply 1-2 light even coats of RAPTOR Acid Etch Primer, allowing 20 minutes drying time before application. **Plastics should be treated with an adhesion promoter such as RAPTOR Adhesion Promoter Aerosol. PLEASE NOTE: this product is not recommended for application over thermoplastic acrylics.

Mixing

Shake the aerosol can for at least 2 minutes before use.
